

**ASSESSMENT OF COMPLIANCE
WITH WESTERN WASHINGTON UNIVERSITY'S
ENVIRONMENTAL IMPACT STATEMENT**

INTRODUCTION

This Environmental Checklist (per State Environmental Policy Act) assesses the environmental impacts of the proposed PW787 South College Drive Improvement project and its compliance with the University's existing Environmental Impact Statement (EIS).

PROGRAM REVIEW

Project involves replacing 16-foot wide median in South College Drive with asphalt, rechannelizing travel lanes, providing 133 angled parking spaces on the east side of the road, providing bicycle and pedestrian accommodations, and replacing plantings.

It is not anticipated that traffic or housing will increase as a result of this project.

REVIEW OF EXISTING EIS

Existing Environmental Impact Statement documents and the South Campus Master Plan were examined in regards to this project. There is nothing in this proposal which seems to conflict with those documents. The following documents were reviewed:

- Draft Environmental Impact Statement, April 1993
- Final Environmental Impact Statement, July 1993
- Western Washington University Neighborhood Plan, September 1998
- Addendum #2 – WWU Campus Master Plan, Final Environmental Impact Statement, December 2000
- Western Washington University Institutional Master Plan – An Addendum to the WWU Neighborhood Plan, September 2001

IMPACT OF FACILITY

No significant impacts are anticipated from the construction and operation of the proposed facility.

CONCLUSION

The construction and operation of this project would not create any significant adverse impacts on the Western Washington University campus.
